3 trips - West Coast
(Av. dur. of trip)
17 trips - New York
(Av. dur. of trip)
2 trips - Boston @
(Av. dur. of trip)
4 trips - East Coast
(Av. dur. of trip)
8 trips - Mid-West
(Av. dur. of trip)

Travel is needed for site visits of construction activity, consultation with engineering firms, visits to industrial establishments and inspection tours of large scale electrical and power transmission systems. In addition, travel is requested for analysis to attend trade association gatherings, international banks, and other sources where information on international financial transactions and manufacturing can be obtained.

Foreign

2 trips - Europe @
(Av. dur. of trip)

Two European trips will be required in order to attend the Fourth Congress of the International Association for Bridge and Structural Engineering in England. The Congress is attended by experts from all over the world and it is expected that a great deal of information can be gathered regarding types of design and construction required to fit varying conditions found in different areas of the world. Direct consultation with European experts in this field together with first-hand observation of European construction methods and standards will enable the analyst to greatly improve estimates of material requirements for commercial and housing construction.
